

OBIN-1 - ORACLE BI 12C: BUILD REPOSITORIES

Categoria: **Business Intelligence**

INFORMAZIONI SUL CORSO

Durata:
5 Giorni

Categoria:
Business Intelligence

Qualifica Istruttore:
Oracle Certified
Professional

Dedicato a:
Professionista IT

Produttore:
Oracle

OBIETTIVI

- Costruire tutti gli strati di un repository: Fisico, Modello di Business, Cartografia e Presentazione
- Compilare ed eseguire analisi per testare e validare un repository
- Costruire misure semplici e calcolate per una tabella dei fatti
- Creare gerarchie dimensione logica e il livello a base di misure
- Modellare tabelle aggregate per accelerare l'elaborazione delle query
- Creare partizioni e facets per migliorare le prestazioni delle applicazioni e la loro usabilità
- Utilizzare le variabili per snellire le attività amministrative e modificare il contenuto dei metadati in modo dinamico
- Usare le funzioni di serie storiche per supportare il confronto temporale di analisi storiche
- Impostare la sicurezza per autenticare gli utenti e assegnare autorizzazioni appropriate e privilegi
- Applicare tecniche di gestione della cache per mantenere e migliorare le prestazioni delle query
- Impostare la registrazione di query per test e debug
- Impostare un ambiente di sviluppo multiutente
- Utilizzare i wizard e i tools dello Strumento di amministrazione per gestire, mantenere e migliorare i repository
- Consentire l'utilizzo del tracking per monitorare query e utilizzo del database e per migliorare le prestazioni delle query
- Eseguire il patching in uno scenario di produzione
- Configurare Oracle BI per supportare ambienti multilingue

PREREQUISITI

Prerequisiti suggeriti :

Basic SQLData warehouse designDatabase designDimensional modelingOracle BI 11g R1: Create Analyses and Dashboards

CONTENUTI

Repository Basics

Exploring Oracle BI architecture components

Exploring a repository's structure, features, and functions

Using the Oracle BI Administration Tool

Creating a repository

Loading a repository into Oracle BI Server memory

Building the Physical Layer of a Repository

Importing data sources

Setting up connection pool properties

Defining keys and joins

Examining physical layer object properties

Creating alias tables

Building the Business Model and Mapping Layer of a Repository

Building a business model

Building logical tables, columns, and sources

Defining logical joins

Building measures

Examining business model object properties

Building the Presentation Layer of a Repository

Exploring Presentation layer objects

Creating Presentation layer objects

Modifying Presentation layer objects

Examining Presentation layer object properties

Testing and Validating a Repository

Checking repository consistency

Turning on logging

Defining a repository in the initialization file

Executing analyses to test a repository

Inspecting the query log

Managing Logical Table Sources

Adding multiple logical table sources to a logical table

Specifying logical content

Adding Calculations to a Fact

Creating new calculation measures based on existing logical columns

Creating new calculation measures based on physical columns

Creating new calculation measures using the Calculation Wizard

Creating measures using functions

Working with Logical Dimensions

Creating logical dimension hierarchies

Creating level-based measures

Creating share measures

Creating dimension-specific aggregation rules

Creating presentation hierarchies

Creating parent-child hierarchies

Using calculated members

Using Aggregates

Modeling aggregate tables to improve query performance

Setting the number of elements in a hierarchy

Testing aggregate navigation

Using the Aggregate Persistence Wizard

Using Partitions and Fragments

Exploring partition types

Modeling partitions in an Oracle BI repository

Using the Calculation Wizard to create derived measures

Using Repository Variables

Creating session variables

Creating repository variables

Creating initialization blocks

Using the Variable Manager

Using dynamic repository variables as filters

Modeling Time Series Data

Using time comparisons in business analysis

Using Oracle BI time series functions to model time series data

Modeling Many-to-Many Relationships

Using bridge tables to resolve many-to-many relationships between dimension tables and fact tables

Localizing Oracle BI Metadata and Data

Localizing repository metadata

Localizing Oracle BI data

Setting an Implicit Fact Column

Adding fact columns automatically to dimension-only queries

Ensuring the expected results for dimension-only queries

Selecting a predetermined fact table source

Specifying a default join path between dimension tables

Importing Metadata from Multidimensional Data Sources

Importing a multidimensional data source into a repository

Incorporating horizontal federation into a business model

Incorporating vertical federation into a business model

Adding Essbase measures to a relational model

Displaying data from multidimensional sources in Oracle BI analyses and dashboards

Security

Exploring Oracle BI default security settings

Creating users and groups

Creating application roles

Setting up object permissions

Setting row-level security (data filters)

Setting query limits and timing restrictions

Cache Management

Restricting tables as non-cacheable

Using Cache Manager

Inspecting cache reports

Purging cache entries

Modifying cache parameters and options

Seeding the cache

Enabling Usage Tracking

Setting up the sample usage tracking repository

Tracking and storing Oracle BI Server usage at the detailed query level

Using usage tracking statistics to optimize query performance and aggregation strategies

Analyzing usage results using Oracle BI Answers and other reporting tools

Multiuser Development

Setting up a multiuser development environment

Developing a repository using multiple developers

Tracking development project history

Configuring Write Back

Enabling write back in a repository

Creating a write back template

Granting write back privileges

Enabling write back in an analysis

Performing a Patch Merge

Comparing repositories

Equalizing objects

Creating a patch

Applying a patch

Making merge decisions

INFO

Materiale didattico: Materiale didattico ufficiale Oracle in formato digitale. Il materiale didattico è compreso nel prezzo sia per i corsi a Calendario sia per quelli Dedicati.

Costo materiale didattico: 0 € incluso nel prezzo del corso a Calendario

Natura del corso: Operativo (previsti lab su PC)
