

# MAZR-11 - MOC AZ-305T00 - DESIGNING MICROSOFT AZURE INFRASTRUCTURE SOLUTIONS

Categoria: **Azure**

## INFORMAZIONI SUL CORSO

**Durata:**  
4 Giorni

**Categoria:**  
Azure

**Qualifica Istruttore:**  
Microsoft Certified  
Trainer

**Dedicato a:**  
Analista

**Produttore:**  
Microsoft

## OBIETTIVI

This course teaches Azure Solution Architects how to design infrastructure solutions. Course topics cover governance, compute, application architecture, storage, data integration, authentication, networks, business continuity, and migrations. The course combines lecture with case studies to demonstrate basic architect design principles.

## PREREQUISITI

Successful students have experience and knowledge in IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platforms, and governance. Students also have experience designing and architecting solutions. Before attending this course, students must have previous experience deploying or administering Azure resources and strong conceptual knowledge of:

- Azure compute technologies such as VMs, containers and serverless solutions
- Azure virtual networking to include load balancers
- Azure Storage technologies (unstructured and databases)
- General application design concepts such as messaging and high availability

Prerequisite course (or equivalent knowledge and hands-on experience):

- Course: AZ-104: Microsoft Azure Administrator

## CONTENUTI

### Microsoft Azure Architect Design Prerequisites

- Describe the core architectural components of Azure
- Describe Azure compute and networking services
- Describe Azure storage services
- Describe Azure identity, access, and security
- Microsoft Cloud Adoption Framework for Azure
- Introduction to the Microsoft Azure Well-Architected Framework

### Design identity, governance, and monitor solutions

- Design governance

- Design authentication and authorization solutions
- Design a solution to log and monitor Azure resources

#### **Design business continuity solutions**

- Describe high availability and disaster recovery strategies
- Design a solution for backup and disaster recovery

#### **Design data storage solutions**

- Design a data storage solution for non-relational data
- Design a data storage solution for relational data
- Design data integration

#### **Design infrastructure solutions**

- Design an Azure compute solution
- Design an application architecture
- Design network solutions
- Design migrations

#### **Build great solutions with the Microsoft Azure Well-Architected Framework**

- Introduction to the Microsoft Azure Well-Architected Framework
- Microsoft Azure Well-Architected Framework - Cost Optimization
- Microsoft Azure Well-Architected Framework - Operational excellence
- Microsoft Azure Well-Architected Framework - Performance efficiency
- Microsoft Azure Well-Architected Framework - Reliability
- Microsoft Azure Well-Architected Framework - Security

#### **Accelerate cloud adoption with the Microsoft Cloud Adoption Framework for Azure**

- Getting started with the Microsoft Cloud Adoption Framework for Azure
- Prepare for successful cloud adoption with a well-defined strategy
- Prepare for cloud adoption with a data-driven plan
- Choose the best Azure landing zone to support your requirements for cloud operations
- Use the Cloud Adoption Framework Migrate methodology to migrate your workload to the cloud
- Address tangible risks with the Govern methodology of the Cloud Adoption Framework for Azure
- Ensure stable operations and optimization across all supported workloads deployed to the cloud
- Innovate applications by using Azure cloud technologies
- Prepare for cloud security by using the Microsoft Cloud Adoption Framework for Azure

## **INFO**

**Esame:** AZ-305 - Designing Microsoft Azure Infrastructure Solutions

**Materiale didattico:** Materiale didattico ufficiale Microsoft in formato digitale

**Costo materiale didattico:** incluso nel prezzo del corso a Calendario

**Natura del corso:** Operativo (previsti lab su PC)
