INFORMAZIONI SUL CORSO

Durata:	Categoria:	Qualifica Istruttore:	Dedicato a:	Produttore:
3 Giorni	EC-Council	Certified EC-Council Instructor	Manager	EC-Council

OBIETTIVI

The EC-Council’s CRAGE (Certified Responsible AI Governance & Ethics) training program aims to train professionals to govern AI responsibly, integrating risk, compliance, and ethics throughout the entire AI system lifecycle. It covers the AI technology ecosystem, strategy and governance, data and model management, as well as security, auditing, and business continuity as applied to AI. The goal is to give participants the skills to align AI projects with regulatory frameworks and international best practices, while managing issues of bias, transparency, explainability, and accountability. This certification is based on a business task analysis and a detailed exam blueprint to closely match the actual responsibilities of AI governance and ethics experts.
CRAGE prepares you to:

- -Validate your ability to embed governance across the AI life cycle
- -Verify skills in building audit-ready programs from ideation to deployment
- -Prove you can help enterprises scale AI with accountability

The CRAGE certification equips you to lead AI governance end-to-end, from policy design to audit readiness. Master compliance frameworks, risk management, and ethical oversight.

PREREQUISITI

CONTENUTI
